

 THE PROPOSED \$29/MONTH PLAN · EARLY ACCESS

One price. One brand.

Your accounts, your spend.

For a founder, independent consultant or small-business operator with a real launch in the next 30 days who wants to do the work themselves. The subscription would begin only when the product is usable; joining the list is free and creates no subscription.

\$29

per month · one active brand · initial package + ten AI revision requests a month

INCLUDED	PROPOSED SCOPE
Brief & research	Guided brief; concise competitor and offer draft with a source behind each line.
Name & identity	Name directions that remember rejected words; endings checked including .com; editable logo, palette and type.
Website	One landing page plus supporting pages, working lead form, one qualifying question, hosted subdomain included.
Ads & campaign	Two still concepts (feed and vertical); guided setup of one Meta campaign in your connected account.
Results	Visits, source-tagged enquiries, spend where Meta reports it, export.
Changes	Ten bounded AI revision requests per billing month. Manual text edits and exports don't count.

Priced separately

Domain registrations and renewals · your advertising spend, billed by Meta · premium video · assisted, done-for-you delivery · generation beyond the allowance, shown with a price before it runs.

What joining means. No card and no charge. Early-access members will see what the builder actually costs to run on real briefs before any subscription starts. Publishing a site and running a campaign never guarantee customers.
